Animals of Russia: bear, tiger, fox

Bears

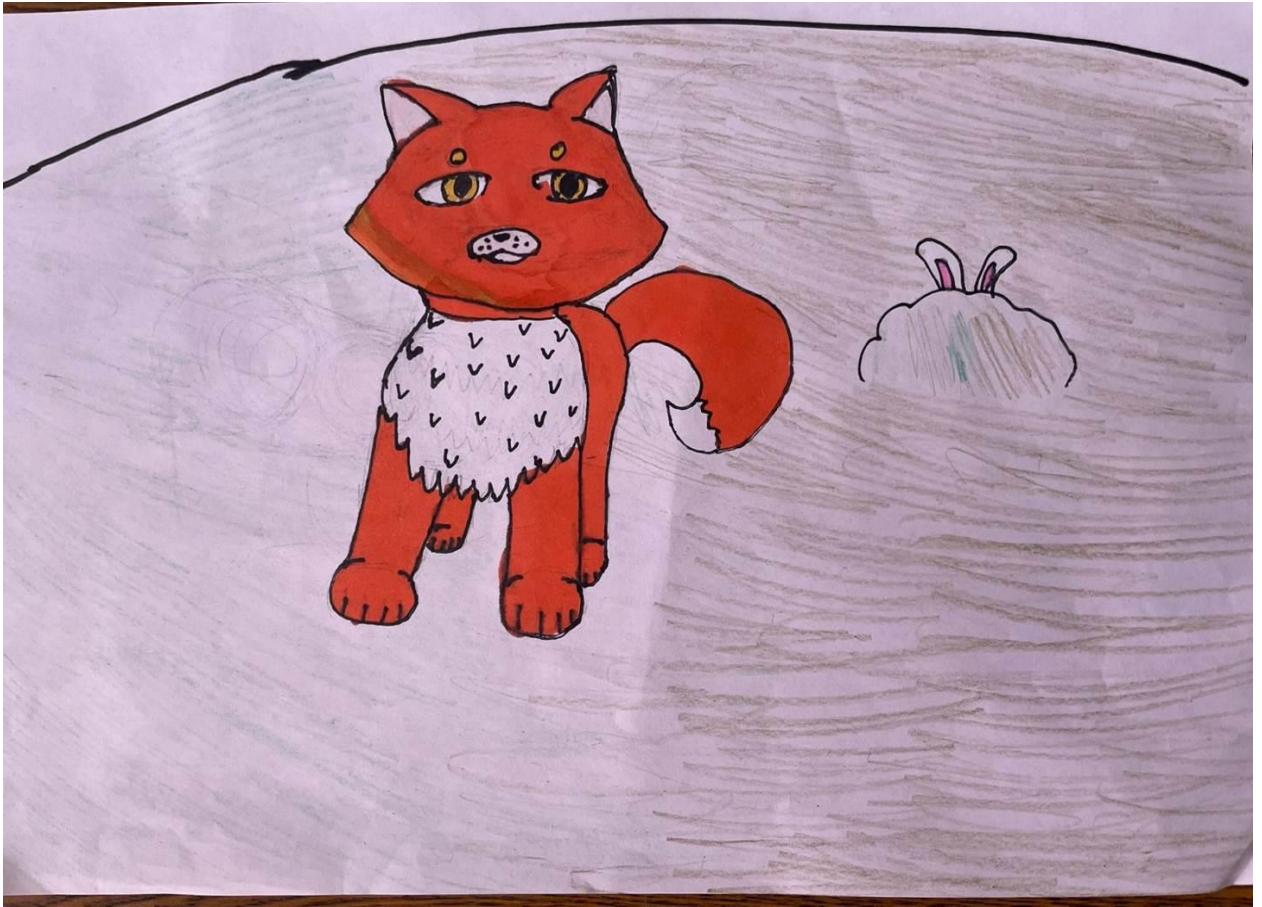

- Bears are very strong animals.
- Bears are big in size.
- They're good at fishing.
- Also bears are very good at climbing.
- They live in forests.

Amur tigers

- Amur tigers are the largest tigers in the world.
- They're good hunters.
- Amur tigers are good swimmers.
- There are around 750 Amur tigers in Russia.
- They got their name from the Amur river.

Foxes

- Foxes are very beautiful animals.
- They're not very big.
- Usually foxes have a red coat.
- Their tails are fluffy and cute.
- Foxes live in forests, they're wild animals.

**Animals of Great Britain: wolf,
hedgehog, seal**

Wolves

- Wolves are wild animals.
- Wolves look like dogs.
- Usually their coat is grey.
- They are very smart and eat other animals.
- Wolves live and hunt in small groups in forests and mountains.

Hedgehogs

- Hedgehogs are small animals covered in spikes.
- They can roll in a ball.
- They hunt for insects, worms and small animals.
- They can run very fast.
- Hedgehogs are active at night time.

Seals

- Seals live in cold seas.
- They have good vision in water.
- Seals eat fish, some also eat squid and shellfish.
- Seals have a thick layer of fat to keep them warm.
- They have flippers instead of legs.
